EDUCATION

University of Texas at Dallas

May 2024

BS, Computer Science

Relevant Coursework: Database Systems, Software Architecture and Design, Data Structures & Algorithm Analysis, and Software Testing, Artificial Intelligence, Validation and Quality Assurance, and Machine Learning.

WORK EXPERIENCE

Paycom

September 2025 – Present

Deployment Engineer

Oklahoma City, Oklahoma

- Automated internal deployment workflows using **Python**, **PowerShell**, **GitLab**, and **YAML-based configurations**, reducing manual release and troubleshooting effort by 30–50% while improving operational efficiency.
- Enhanced **GitLab CI/CD pipelines** and deployment automation across production environments, increasing release reliability and reducing deployment risks during major software releases.
- Executed and monitored production deployments leveraging GitLab CI/CD, Docker, Kubernetes, and infrastructure automation tools, proactively resolving bottlenecks and improving system stability.

Paycom

May 2025 – August 2025

DevOps Intern

Oklahoma City, Oklahoma

- Collaborating with teams using tools like **GitLab** and internal **CI/CD** systems to ensure fast, stable code delivery across production environments.
- Gaining hands-on experience managing servers and automation pipelines through the use of **Docker**, **Yamls**, and **Kubernetes**.
- Established a role scheduler through **Python** and **MongoDB** that allowed quicker, less manual generation for multiple teams through **React** library.

Amazon Web Services

May 2022 – August 2022

Software Developer Intern

Portland, Oregon

- Built a **backend API** for dynamic content integration, preserving data stream sync and improving UX part of systems serving **3M+** AWS users globally with **Kotlin**.
- Created reusable functions to segment large video files containing **metadata**, boosting dev efficiency in video boundary logic.
- Worked with **GitHub**, **CI/CD pipelines**, and **UNIX** environments, gaining hands-on experience in cloud-native development and **AWS** services.

PROGRAMMING PROJECTS

Tutoring Website

- Worked with a **scrum** team to develop a website that allows students and tutors to connect and schedule meetings together.
- Functional **REST** database with hashing password protection in **MySQL** and **PGAdmin** servers.
- Designed the front-end with **Javascript** and **HTML** and connected the back-end with **Python** libraries in a **Flask** Environment.

AI Virtual Assistant

- Utilizing **ChatGPT API** and **Python** to develop a unique virtual assistant.
- Created with additional functionalities like emotion evaluation through **LLMs** and a changing character model to reflect corresponding emotions using **Hugging Face** publicly available models.

TECHNICAL SKILLS

- **Languages:** Kotlin, Java, SQL, Python, Javascript/HTML/CSS, BASH, C#, Yaml
- **Environments and Frameworks:** Node.js, Flask, PGAdmin, Unity, Linux
- **Tools:** Github, Gitlab, AWS, Junit, Xcode, Hugging Face, React, MongoDB, K9s
